

Small Cap Growth: Performance & Commentary

PERFORMANCE SUMMARY

The strategy returned 13.03% before fees (12.76% net of fees) in the second quarter of 2025, compared to the 11.97% return of the benchmark Russell 2000 Growth index.

The quarter started with a deep, but quick, pullback due to the initial reaction to President Trump's tariff announcements. The performance coming off the bottom was driven by the market becoming more comfortable with the idea that favorable trade deals would be announced, better macroeconomic data, and the belief that the Fed would begin lowering interest rates sooner rather than later. Following the outperformance in Q2, the strategy is now outperforming YTD and continues to follow the previous five consecutive years of outperforming the benchmark index.

Stock selection was again a positive contributor during the second quarter, driven by Discretionary (Hotels, Restaurants & Leisure and Specialty Retail), Health Care (Pharmaceuticals and Equipment & Supplies), and Technology (Semiconductors). Partially offsetting this was underperformance in Materials (Metals & Mining and Chemicals), Financials (Financial Services), Energy (Oil, Gas & Consumable Fuels) and Staples.

Sector allocation was also a positive contributor to performance in the quarter, led by our overall underweight in Health Care, where we have little to no exposure to biotech, our underweight in Real Estate, and our overweights in Industrials and Technology. This was somewhat offset by our underweight in Energy.

MARKET OUTLOOK

The actions of the Federal Reserve have been front and center for investors for some time now and at the beginning of the second quarter, President Trump gave investors a new focal point – tariffs. While the market's first reaction was negative, it appears that investors have become comfortable with the idea that actual tariff rates will be less impactful than first thought and that a trade war will be avoided.

As for the Fed, the committee has held interest rates steady but exited their June meeting with updated projections of lower growth and higher inflation, brought in part by the belief that the new tariffs could be inflationary. However, the market rally during Q2 seems to be anticipating that the Fed will lower rates faster than originally expected as favorable economic and inflation data has been reported over the past few months and companies have reported less impact from tariffs thus far.

With the passage of the "Big Beautiful Bill", many of the tax policies and regulatory changes in the bill are expected to provide stimulus to the economy. Combined with potential accelerated/additional rate cuts from the Fed and less impact from tariffs than originally thought, the market rally in Q2 appears to reflect the improved optimism of investors.

The Small Cap Growth strategy remains focused on building a diversified portfolio of companies with higher quality operations and the ability to generate positive cash flow returns while maintaining lower debt leverage. Even with potential short term market volatility spikes driven by global events or domestic policy changes, we believe this process should continue to allow for positive long-term returns.

STRATEGY OVERVIEW

Benchmark: Russell 2000 Growth

Inception Date: November 1, 2000

STRATEGY SUMMARY

The Small Cap Growth strategy uses a fundamental, bottom-up approach designed to identify underpriced securities with a strong potential for long-term appreciation. The investment process starts with a deep fundamental analysis of the universe by our sector specialists who then evaluate projected levels of cash flow return on investment to identify those stocks that provide the highest potential appreciation. The portfolio is then constructed using what we feel are the most attractive stocks by sector with a focus on risk management strategies.

As of June 30, 2025. All benchmark returns presented are provided to represent the investment environment existing during the time periods shown. Actual investment performance will vary due to fees and expenses. Investment performance reflects the reinvestment of dividends and other income. Gross-of-fees performance is shown net of trading expenses. Net of fees performance is shown net of a model investment management fee that is equal to the highest fee charged to the intended audience. For comparison purposes, the benchmarks include the reinvestment of income. Indices are unmanaged, do not reflect fees and expenses, and are not available for direct investment. Past performance is no guarantee of future results.

Ziegler Capital Management, LLC, doing business as ZCM, claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ZCM has been independently verified for the periods 01/01/01-12/31/23. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The MVP Small Cap Growth composite has had a performance examination for the periods 11/01/14-12/31/23. The verification and performance examination reports are available upon request. The performance shown from inception to 11/01/14 was the performance of Missouri Valley Partners (MVP). MVP was independently verified for the periods 08/29/00 through 10/31/14 and the MVP Small Cap Growth composite was examined for the periods 11/01/00- 10/31/14. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

ZCM is a registered investment advisor that became a majority owned indirect subsidiary of 1251 Capital Group, Inc. that they acquired from Stifel Financial on March 27, 2020. ZCM was formed in 1991 and has grown significantly through strategic business combinations. Through these combinations, we have expanded our investment strategy offerings and broadened our portfolio management teams to best serve our expanding client base. ZCM's CEO changed in May 2021, and in February of 2023. Please refer to the firm's ADV Part 2 for additional disclosures regarding the firm and its practices. ZCM's definition of the firm used to determine the total firm assets and firm-wide compliance includes all fee-paying and non-fee-paying discretionary and non-discretionary assets under management, including accrued income, in all strategies. Assets under Advisement ("AUA"), in the form of model portfolios provided to other financial institutions, are excluded from our definition of the firm and are provided as supplemental information. Returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other earnings. Past performance is no guarantee of future results. A list of broad distribution and limited distribution pooled funds is available upon request. To obtain a GIPS report or a list of our composite descriptions and/or policies for valuing investments, calculating performance, and preparing GIPS reports, please call (312) 368-1442 or send an e-mail to letters@zieglercap.com.

Composite and Benchmark Description: The MVP Small Cap Growth strategy invests primarily in U.S. based, small company equity securities. The portfolio is diversified across all major economic sectors while maintaining sector exposure limits within 10% of the benchmark. Maximum individual position size is limited to no more than 5% of the total portfolio by market value. The strategy seeks long-term growth of capital. Dividend income is generally not a consideration of this strategy. Smaller company equity securities can carry increased level of risk and are less liquid than larger company equity securities. The benchmark is the Russell 2000 Growth Index. The Russell 2000 Value Index measures the performance of the small- cap value segment of the US equity universe. It includes those Russell 2000 companies with relatively lower price-to-book ratios, lower I/B/E/S. forecast medium term (2 year) growth and lower sales per share historical. A portfolio manager and an assistant portfolio manager on the Small Cap Growth team left the firm in May 2012, however, the investment process remained intact following their departure.

Minimum Account Size: No minimum

Composite Creation and Inception Date: The MVP Small Cap Growth composite creation date is October 31, 2014. Prior returns reflect the performance of Missouri Valley Partners, Inc. ("MVP"). The composite inception date is November 1, 2000. At MVP the composite contained fully discretionary, tax-exempt, small cap growth equity non-wrap accounts only.

Significant Cash Flow Policy: Beginning January 1, 2015, portfolios with significant cash flows are excluded from the composite. Cash flows of 10% or more are considered significant.

Internal Dispersion: The internal dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for the period. If there are less than 6 portfolios in the composite for the entire year, the internal dispersion is not statistically meaningful and is presented as N.A. All risk measures are calculated using gross-of-fees returns.

Fees: Gross-of-fees returns are presented after trading expenses and before management fees. Net-of-fees returns are presented after model management fees for a \$10 mm portfolio applied on a monthly basis. The highest applicable management fee was 1.00%. Fees are calculated separately for each portfolio, and therefore, performance may differ from one portfolio to another. The effect of fees and expenses on performance will vary with the relative size of the fee and account performance. For example, if \$10 million were invested and experienced a 10% compounded annual return for ten years, its ending dollar value, without giving effect to the deduction of the advisory fee, would be \$25,937,425. If an advisory fee of 1.00% of average net assets per year for the ten-year period were deducted, the annual total return would be 8.95% and the ending dollar value would be \$23,565,266. The fee schedule is: 1.00% on the first \$10 million and 0.90% on all additional assets.

Other: Strategy assets include all portfolios in the MVP Small Cap Growth strategy, even those portfolios that are excluded from the composites because of significant cash flows or for other reasons, and include non-wrap, wrap and UMA assets. This is presented as supplemental information.

Disclosures

This review is for institutional advisory clients of F/m Investments. The strategy review often expresses opinions about the direction of market, investment sector and other trends. The opinions should not be considered predictions of future results. The information contained in this report is based on sources believed to be reliable, but is not guaranteed and not necessarily complete.

Information contained herein is for informational purposes only and is not a recommendation to buy or sell any security. Contribution to portfolio return is calculated by multiplying the total return for the security by its average weight in the portfolio. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings. A complete list of all holdings is available upon request. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities represented herein. Other factors may impact overall performance for different accounts including the execution and timing of trades and any wrap sponsor's policies.

All investments involve risk, including loss of principal, and there is no guarantee that investment objectives will be met. Equity securities are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors to varying degrees. Equity securities may rise and decline in value due to both real and perceived market and economic factors as well as general industry conditions. Small capitalization stocks are likely to be more volatile in price and carry a higher risk of failure than large capitalization stocks. Indices are unmanaged, do not reflect fees and expenses and are not available as direct investments.

Russell 2000 Growth® -The Russell 2000 Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values.
